## ACKNOWLEDGEMENTS

The editors are grateful to the Leibniz Institute for Research on Society and Space (IRS) for funding the research (between 2012 and 2014) on which this book is based. They would like to thank Andreas Röhring, Ross Beveridge, Hisar Ersöz, Jonas Mutschler and Henrika Prochnow at IRS for their huge support in producing the manuscript and the staff at Palgrave, especially Christina Brian and Ambra Finotello, who have been most helpful in planning and producing the book from beginning to end. We are indebted to the anonymous reviewer of the book proposal and draft manuscript for valuable guidance and advice.

## NOTES ON THE CONTRIBUTORS

**Sören Becker** is a human geographer and political scientist working at the Leibniz Institute for Research on Society and Space (IRS) in Erkner, Germany. His research interests are new forms of organisation and ownership in the energy sector, local democracy and socio-material change.

**Ross Beveridge** is a research fellow at the IRS. His work focuses on the politics of the environment at the urban level. His recent research was on the theme of energy and water remunicipalisation.

**Andrea Bues** is a political science PhD student conducting research on the power aspects of energy transitions. In her doctoral research at the IRS, she focuses on disputes over wind turbines in Germany and Canada. She has previously worked on land-use and water conflicts in Ethiopia and Cambodia, as well as on the land-water-energy nexus in agriculture.

**Ludger Gailing** is deputy head of the research department Institutional Change and Regional Public Goods at the IRS. In his work he draws on concepts relating to governance theories, neo-institutionalism, constructivist perspectives on space and place, governmentality and socio-materiality. Current research foci include the German energy transition and landscape policies.

**Timothy Moss** is head of the research department Institutional Change and Regional Public Goods at the IRS. His research interests span the governance of urban infrastructures in the past and the present, the spatial organisation of water and energy and the institutional dynamics of resource use in cities and regions.

**Matthias Naumann** is a research fellow at the IRS. He is also a visiting lecturer at the Brandenburg University of Technology Cottbus. His research interests include urban and regional development, infrastructure governance and critical geography.

**Andreas Röhring** is a senior researcher at the IRS. His research interests cover the institutional dimensions and the spatial organisation of renewable energies and cultural landscapes.
